

Technical Marketing Manufacturing, Inc.

Come to TMMI's Web HMI 2.0 Workshop

Come see a free, half-day workshop of Web HMI 2.0, which includes:

Support of both GE HMI/SCADA Products – Both iFIX AND CIMPLICITY integrate Web HMI 2.0, including support of OPC-UA servers for both data and alarm integration.

Equipment Model & Link Navigation – New interactive configurators for implementing equipment model and display link navigation.

Historical Trending and Animation – Historian tag references can now be incorporated into animations and trending alongside real-time SCADA tags.

Trending Improvements – Up to 20 pens can be displayed on a chart, including both live and historical data. Improved interactivity with panning and zooming time and interactivity with individual pens.

Register Today – Space is limited to this hands-on workshop. Product feature update and demo followed by hands on exercises - PCs will be provided.

When & Where – **8am to 2pm, October 18th, TMMI Tempe** office and **October 19th at the TMMI Wheat Ridge** office. Workshop includes continental breakfast and lunch.

Cost - Free

Registration - Contact Britney Weller at (303) 232-1516 or at <http://www.tmmi.com/workshop-schedule.html>
