

THINMANAGER®

Customer Two Day Training ThinManager Deployment with Relevance Demo

Course Description:

The ThinManager Training is a hands-on technical course, covering the details of creating, configuring, deploying and managing a ThinManager thin client system.

This two day class schedule begins with the basic functions and adds features and details as the class progresses. Mobility solutions with Relevance are demonstrated but are not taught in this class.

R E L E  A N C E.™

Who Should Attend?
